Rationale for goal

The statewide undergraduate total enrollment goal was determined by adding the goals of the public universities and AIKCU, which were negotiated based on 2020 projections, cohort data, historical trends, and institutional programs and priorities.

About this measure

This indicator tracks the number of full-time, part-time, degree-seeking, and nondegree-seeking undergraduate students who are enrolled in a public or independent college or university in Kentucky, including KCTCS, in the fall semester. Though less important than degree production, increasing enrollment is an essential strategy for doubling the number of degree holders by the year 2020.
